Devices Expert

Four PhD and registered Professional Engineers at Miller Engineering are celebrating 40 years of Professorships at three universities along with providing services to Government, Insurance, and Industry—through research, publications, presentations, and expert testimony. The span of our collective academic and experiential expertise includes the Mechanical, Electrical, Chemical, Agricultural, Industrial, Human Factors, Ergonomic and Safety fields of engineering.

ABOUT OUR COMPANY

Miller Engineering's principal engineers wrote the original books on warnings and instructions, have published in several other areas, have participated in product designs and patents, and have analyzed, reconstructed, and/or animated numerous types of accidents. We maintain a full-time staff of experts, engineers, and highly-educated technical personnel.

All work and files are managed out of our secure Ann Arbor, MI office adjacent to the University of Michigan's engineering campus and research complex. We are known for our staff's thorough, detailed documentation and portrayal of accident sequences and the surrounding environmental circumstances.

OUR AREAS OF EXPERTISE

- Accidents
- Workplace Safety
- Product Compliance
- Consumer Products /
Product Liability
- Warnings, Labels, &
Instructions

ENGINEERING & TECHNICAL STAFF
